Wemo Pic Vision

W-PVS-VF-1

Are you looking for a reliable, easy-to-use, and flexible insertion feeder system? Look no further than Wemo's Pic Vision system. Designed to streamline your production process, our Pic Vision system integrates seamlessly with Wemo or ABB robots and comes equipped with our state-of-the-art Wemo Finder Vision Software and a vibration feeder.

Our modular robot feeder comes in various sizes and configurations, offering unparalleled flexibility for seamless integration into your system or production line. This daily superhero excels at handling delicate parts while minimizing the risk of surface defects. Designed to efficiently separate, move, and place your products, it enhances operational efficiency and meets, even exceeds, your specific requirements.

Why Choose Wemo's Pic Vision System?

- √ Flexible setup in combination with Linear-, six-axis or scara robots
- √ Cycle time per detail is 2-5 s
- √ Suitable for shorter series.
- √ Provided with Quick Changer system for easy replacement of EOAT .
- √ Perfect for insert moulding or assembly applications.

W-PVS-VF-2-LR (Wemo Pic Vision System with Vibration Finder 2 + Wemo 3-5 W-TP3, with WIPS control system)

The advantages with Wemo Pic Vision:

- √ Flexible Setup
- √ Efficient Cycle Time
- √ Advanced Vision Software
- √ Quick and Easy Changes
